Type of work:

£1.5m
Waterproofing bridge decks and associated surfacing on existing M25 structures

Type of client:
Construction product:
Approx m2:

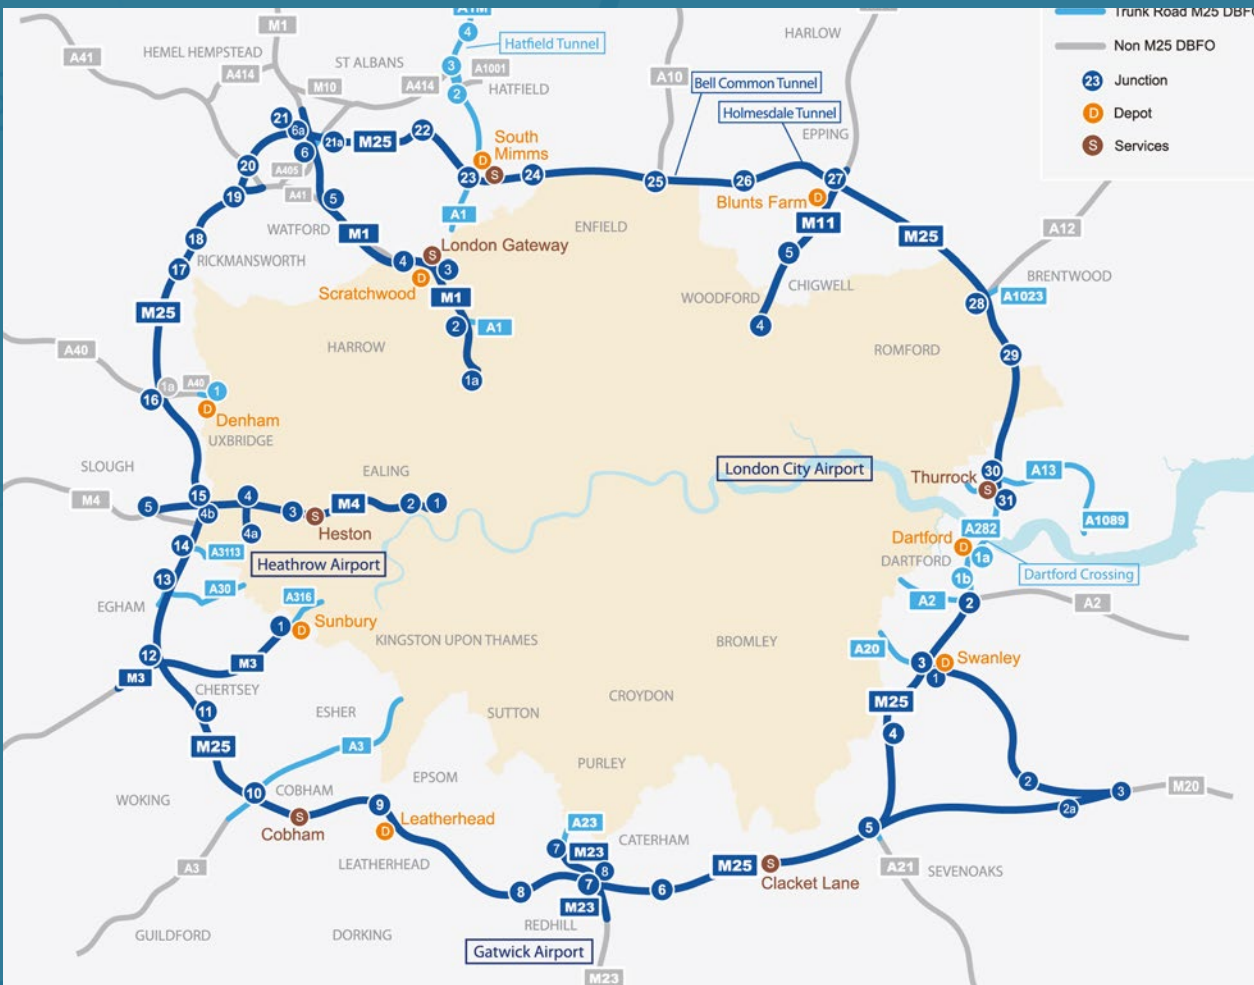

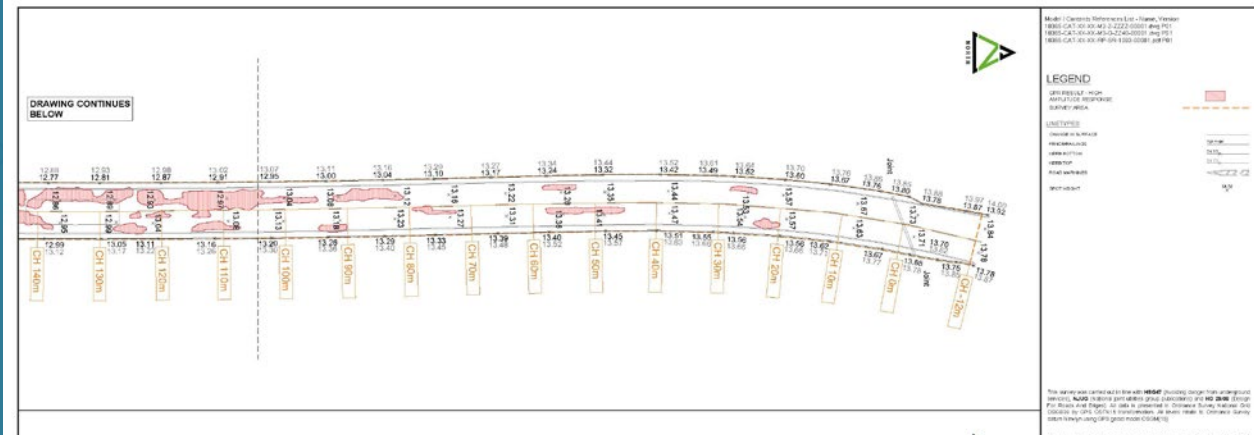

DBFO
Highways
1500

Highlights

Over the past year, the M25 EMI (Enhanced Maintenance Intervention) Waterproofing team has been responsible for managing surfacing and waterproofing defects across the entire M25 network in a more proactive way, planning defect repairs in clusters, and adopting new working methods to ensure the best value for the client.

Over the course of 2018 they delivered eight separate repair schemes, saving 26 night shifts, 7800 man hours and £1.04m cash.
